05 | OUR MATERIALS

Certified Eco Healthy Materials

We promote outstanding functionality, high-end design and eco-friendly practice. Our cabinets are made with E0 European standard particle boards to ensure the cabinetry is free of cancer-causing materials. Customers can enjoy a 10-year warranty.

Our eco-friendly furnitures are International Low-formaldehyde Standard. Formaldehyde is a colourless, strong smelling gaseous substances in the manufacturing of press wood product.

Certified Eco Healthy Materials

Low-formaldehyde standard is strictly required by countries such as European Union, United States, China and Japan.

Formaldehyde is a colourless, strong smelling gaseous substances in the manufacturing of press wood product.

It is used as an adhesive in wide range of wood products, such as furniture, flooring, cabinets, bookcases and building materials. Long exposure to formaldehyde could cause adverse health effects and even cancer. These health effects can happen in anyone, but children, older adults, and people with asthma and other breathing problems are more likely to have these symptoms.

What are customized cabinets ?

Customized cabinets are storage cabinet which are measured, designed and built to fit a unique room. They are quality-built with high quality materials, hardware, and finishes. Customized cabinet are usually meticulously handcrafted by intricate and skilled craftsmanship to be later delivered and installed inside your home.

Why we should invest in customized cabinet ?

Having a well-designed cabinet is essential as it allows completing tasks safely, efficiently and easily. Here are the most important reasons that explain why custom cabinets are significant to your home :

- **Personalized style and preference:** There is unlimited choice of styles and materials that fit your need and styles. You can decide the materials and design for each cabinet according to your personal preference that represents and suits you best.
- **Premium quality and durability:** Having your custom-built cabinets can ensure that you get the top-quality materials, from the type of wood to the hardware and installed to the highest standard quality. This ensures the quality of the product made and is built to last many years.
- **Space optimization and multi-functional:** With custom cabinetry, everything is tailored to the layout and floor plan. It provides the flexibility to create the very best solution to suit your specific needs and can be designed to fit any size. While innovative storage solutions and accessories can also be highly beneficial in maximizing storage space and efficiency.

Kitchen Layout Guides

Make Your Kitchen Work For You

Food Storage:

- Refrigerator
- Freezer
- Pantry

It is recommended that your food storage is as close to the kitchen entry as possible for efficient unpacking and less distance to lug heavy groceries.

Cooking.

- Range
- Ovens
- Cookware

Your cooking components should be near each other; by having your cookware close at hand to your range & oven you save time in meal prep.

Clean Up:

- Sink
- Dishwasher
- Dish Storage

Place your dishwasher near your sink and disposal, then dirty dishes can be tackled easily.

Matching your space with unique shape and functionality

U-shaped

If you could use more space consider a U-shape. It is perfect for one or more cooks.

Galley

A galley is an efficient workspace for a single cook.

L-shaped

A definite advantage of the L-shape is generous counter space and people can come in and out without entering your work area.

G-shaped

A modification of the U-shape, the G adds more cabinets and a potential fourth wall.

Single Wall

A single wall layout is a necessity in smaller homes and apartments where space is limited.
